

Professional washer-disinfectors

In sterilisation and sub-sterilisation units, machine **washing** and **disinfection** through the combined action of time and temperature is a key step in the sterilisation process. Thanks to special inserts or trolleys, Smeg Instruments washer-disinfectors can process surgical instruments (instrument washers), clogs (clog washers), containers, anaesthesia sets and micro-instruments.

Fully **customisable** solutions, **flexible** and **efficient** services, and **reliable** and **certifiable** results.

MADE IN ITALY

By providing the world of **professional washing** and **disinfection** with cutting-edge products that expertly interpret the industry's needs, Smeg Instruments has become a symbol of **Italian manufacturing excellence**.

FLEXIBLE AND VERSATILE SOLUTIONS

Each product category and set of solutions is tailored to the unique requirements of equipment operators in specific industries:

Easy to use thanks to the user-friendly and highly intuitive display;

Flexibility for various washing needs and thanks to a broad range of available accessories.

Washer DisinfectorsWD6010

Type

High capacity thermodisinfectors

Working temperature

Up to 95 °C

Door

2, balanced swing door in glass

Washer Chamber Material

Stainless steel AISI 316L

Dimensions of the product WxDxH (mm)

650x712x1942

DIN loading capacity

up to 12
